£142.80	**£202.80**	**£262.80**
£119 + VAT	£169 + VAT	£219 + VAT

Extra time: £78 / £96 / £114 inc. VAT per 30 mins

✓ Parts quoted and agreed before fitting

✓ Nothing beyond the first hour without your OK

Your engineer, not a call centre

ID shown on arrival

Your engineer shows their ID at the door, so you know who you're letting in.

Common parts on every van

Common parts are carried on every van, and the engineer confirms the price before fitting anything.

Fully insured

With the standards you'd expect from the LINX group.

While you wait

1

Turn off the stopcock

It's usually under the kitchen sink. Turn it clockwise until it stops. In flats it may be in a cupboard, under the bath or in the hallway.

2

Keep water away from electrics

If water is near sockets, switches or light fittings, switch off at the consumer unit, but only if you can reach it without standing in water.

3

Take the pressure off

With the stopcock off, run the cold taps to drain the pipes. If a toilet is blocked, don't flush it again until it's cleared.
